The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishikawa.

Ishikawa disclose flame retardant panels comprising foamed polyurethane and heat resistant composite granules (see abstract and claim 13). The composite granules are taught as comprising a variety of materials including perlite admixed with adjuvants including phosphates and borates (see claims 1-11). The granules are taught as suitably sized from powders to several mm in diameter (column 5, lines 20-23).

Therefore, the reference anticipates the reject claims.

Claims 9-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
